Joint Tactical Radio System

Description:

- A Family of Joint Multi-Channel/Multi-Mode, Software-Defined, Re-programmable Tactical Radio Systems. Provides high capacity line of sight (LOS) and beyond line of sight (BLOS) plain and secure voice, data, and video while operating in frequency bands from 2 MHz and up. Provides network connectivity across the radio frequency (RF) spectrum and supports tactical digital information exchanges.
- JTRS includes the Wideband Networking Waveform (WNW) to support the communication requirements of the warfighter not achievable with today's systems.
- Ground domain variants will provide vehicle, man-pack, and hand-held radios.

Fielding:

	FY 06	FY 07	FY 08	FY 09	FY 10	FY 11
Vehicle	70	300	334	335	335	335
Manpack	0	355	760	860	862	972
Handheld	597	9	18	18	110	205
